WELLNESS & FITNESS PROGRAM

August 4, 2008

Dallas Fire-Rescue

Importance of the Program

- Protect DFR's #1 asset: Firefighters
- Improve the physical fitness of Firefighters
- Identify and treat the medical hazards of the profession:
 - Increased risks of cancer
 - Increased risk of cardiac problems

Overview

- On October 1, 2007 DFR received funding from the City Council for the Wellness-Fitness Program
- Contract negotiations were compiled with MedProvider in February 2008
- Wellness-Fitness exams began March 3, 2008
- The current contract is for an 18-month term:
 - Provisions provide for two 12-month extensions, with Council approval
- The current funding for this program is for \$1.2 million per year

MedProvider

MedProvider is the physician group contracted to administer the Wellness-Fitness Program to the Department

Services provided:

- Complete physical examinations
- Fitness Evaluations - with Tom Landry Center
- Medical advice during consultation
- Aggregate data provided periodically to the Department

Physical Exams

503 Firefighters have had physical exams through the Wellness-Fitness Program:

- Fit for Duty = 417
- Conditional = 80
- Limited Duty = 6

Fitness Assessment

503 Firefighters have also had a fitness evaluation:

- Superior = 344
- Excellent = 128
- Good = 28
- Fair = 3
- Poor = 0

Success Stories

Many Firefighters are now aware of and under a physician's care for problems with blood pressure, cholesterol, triglycerides and glucose levels

Blood screening has also provided valuable information on prostate levels:

- Some are currently under treatment for prostate cancer
- Other Firefighters are currently monitoring increased PSA levels

Success Stories

Cancers diagnosed:

- Prostate
- Thyroid
- Colon

Some Firefighters have been referred to specialists due to concerning spots on lung tissue and also possible bladder cancer

Success Stories

Cardiac:

- Several Firefighters have undergone minor procedures and continue cardiologist supervision
- One Firefighter had 4 blockages – 100%, 95%, 75%, and 50% – that required 2 heart surgeries

Success Stories

Weight Loss:

- Improved nutritional choices
- Increased awareness of fitness levels
- Fitness Center attendance rising
- Station personnel are requesting new/improved exercise equipment

Aggregate Data

Aggregate data allows the Department to identify needs of members, set goals, and gauge effectiveness of the Wellness-Fitness Program in the coming years

The latest data represents the first 503 Firefighters to complete this program:

- The next two slides reflect this data

Firefighters at High Risk

- Hypertension
($>140/90$) = 68
- Cholesterol
(>240) = 35
- Triglyceride
(>200) = 49
- Glucose
(>126) = 8

Possible Cases

- Hematuria = 45
- Cardiac = 37
- Cancers = 50

Peer Fitness Trainers

60 DFR members completed a training program at the Cooper Institute

- Training included:
 - Fitness programs
 - Health concerns
 - Minimal nutrition advice
- Trainers assist fellow Firefighters:
 - Establish workout programs
 - Preparation for the Wellness Exam

Future 2009-2010 Program Cycle

Provide physical exams for every member of the Department annually:

- Continued relationship with MedProvider
- Lab work to include thyroid screening
- Include EBCT scans as part of physicals:
 - Ascertains all cardiac blockages as small as 12%
 - Discovers any masses in the torso area

An elliptical machine at each fire station for improved cardiovascular fitness

Future

- Implement “Nutrition Now” Program
- Program was developed by the Cooper Institute for the U.S. Navy to cover both fundamental aspects of nutrition as well as practical application for Firefighters to assess dietary practices:
 - Proven curriculum
 - Nutrition education and healthy dietary change
 - Behavioral strategies and new skills for weight management
 - Encourages realistic lifestyle changes
