Sanitation Services

Proposed FY11 Budget

Council Briefing

August 23, 2010

What does Sanitation do?

- **Serve Dallas' single-family residences by collecting residential waste and recyclables**
 - Cost of service is driven by:
 - Labor, equipment, fuel - 71% of expenses
 - Self-supporting through Sanitation Fee
 - Fee is a **full-cost recovery** model – not subsidized by General Fund

- **Operate regional landfill (McCommas Bluff)**
 - Primary purpose to meet residents' needs
 - Residential customer generates 35% of landfill waste
 - Residents pay “cost” for landfill use
 - Provides disposal for commercial waste haulers
 - Deliver 65% of waste stream – about 1.1M tons
 - Pay **market rate of \$21/ton** – generating net revenue for General Fund

What's different in the SAN service?

- **No change in service to customers**
- **Residential rate decrease of 9¢**
 - From \$20.34 to \$20.25
 - 2nd rate decrease in two years
 - Largely due to ***OneDAY Dallas*** and fuel costs
- **Budget amount cut by \$1.7m (or 2.3%)**
- **Slight increase in landfill fee**
 - From \$21 to \$21⁵⁰/ ton, due to CPI increase
 - No cost effect on residential customer

EXPENSES

– and how they affect SAN Fee

■ Expense reductions

- **(\$1.4M): OneDAY Dallas**
 - Full-year savings from *OneDAY*
- **(\$1.2M): Fuel**
 - SAN vehicles annually use 2M gal
 - Majority is diesel and CNG
 - In FY11, fuel rate lowered to \$2.66/gal; usage to drop by 12%
- **(\$0.5M) Furlough, pay cuts**
 - All SAN staff to use furlough day, with flexibility to maintain service
- **(\$0.3M) Other**
 - Delay concrete crushing & mulching
 - Adjust trash collection frequencies at city facilities

■ Cost Increases

- **\$1.1M: Contract for Day Labor**
 - New 3-year contract increases cost of day labor by 8%
- **\$0.9M: Account changes**
 - Number of SAN accounts decreased from 236,810 to 236,147 (more home vacancies from slow economy)
 - Non-collectable rate rising to 2% (fewer are paying their bills)
- **\$0.2M: Facility Upgrades**
 - Replace weigh scales, modify aging structures at transfer sites
